

Jackson Hefke's Resume Website

This website is going to be a personal resume for myself. This website will list things such as work experience, other accomplishments, and groups I've been a part of. The main goal of this site is to move my resume from a document into a website format.

This site is a page about me, from job experience to personal and educational accomplishments, this page will show it all off. This site won't be able to be used specifically by others, but possibly as a template or idea for their resume sites in the future. I think this site would be a good piece to add to my resume to assist in growing my documented resume, along with my newly gained skills with HTML and CSS.
